IFEOMA JOSEPHINE OKEKE

ENTRY-LEVEL SOC ANALYST | CYBERSECURITY

Nigeria | ifyjose777@gmail.com | linkedin.com/in/ifeoma-jose-okeke/

PROFESSIONAL PROFILE

Entry-level cybersecurity candidate developing practical SOC Analyst skills through controlled, hands-on home-lab investigations. Building experience in Linux security-log review, authentication and session analysis, network reconnaissance, SIEM monitoring and intrusion detection. Familiar with Kali Linux, Ubuntu, VMware, Wazuh, Suricata and Nmap. Brings more than 12 years of transferable administrative and business-support experience, including accurate recordkeeping, information handling, customer communication and structured documentation. Seeking an entry-level SOC Analyst or Security Operations opportunity where practical skills, attention to detail and continuous learning can contribute.

CYBERSECURITY SKILLS

SOC foundations: Security monitoring concepts, event review, alert awareness, incident documentation and escalation fundamentals

Linux investigation: journalctl, review of authentication and session records, who, last, stat, grep and command-line navigation

Security tools: Wazuh, Suricata, Nmap, John the Ripper (lab practice)

Platforms & lab: Kali Linux, Ubuntu, Metasploitable, VMware Workstation

Technical foundations: TCP/IP and network reconnaissance fundamentals, basic SQL, Windows and Linux operating-system concepts

Professional strengths: Attention to detail, structured documentation, confidentiality, research, record accuracy and independent task execution

HANDS-ON CYBERSECURITY LABS & PROJECTS

Linux Log Investigation | In progress

- Reviewing Linux login, session and system records in a Kali Linux lab using journalctl and account/session utilities.
- Comparing log evidence and file metadata, checking for authentication-related events, and documenting findings with clear limitations.
- Practising evidence-based interpretation: distinguishing observed activity from assumptions and avoiding unsupported conclusions.

Network Reconnaissance | Lab practice

- Used Nmap in an authorised virtual lab to identify reachable hosts, open ports and advertised services.
- Practised interpreting scan output and recording exposed services for further security review.

SIEM & Intrusion Detection Lab | Practical setup

- Worked with a Wazuh manager environment and Suricata network intrusion detection on a virtual lab setup.
- Practised service-status checks, configuration validation and locating Suricata event output for subsequent review.

PROFESSIONAL EXPERIENCE

ZOBA VET | Veterinary Hospital — Administrative & Business Support (descriptive role) | 2012–2024

- Supported a business owner with day-to-day administration, records management, scheduling and operational coordination.
- Maintained customer, business and inventory records, checking information for accuracy and keeping documentation organised.
- Handled customer communication and follow-ups by telephone and SMS, updating records to support continuity.
- Assisted with flight bookings, travel arrangements and visa application processes; conducted online research and organised findings.
- Handled business and customer information with discretion while managing multiple responsibilities independently.

ZAWADZKI NIG LTD | Travel Agency — Administrative & Records Support (descriptive role) | 2024–2025

- Maintained and updated records, coordinated bookings and scheduling, organised documents and supported administrative follow-ups.
- Handled assigned responsibilities with attention to detail, accuracy and confidentiality.

EDUCATION & PROFESSIONAL DEVELOPMENT

- National Open University of Nigeria (NOUN) — B.Sc. Information Technology, in progress (2023–2028 expected).
- ISC2 — Introductory Cybersecurity Course, completed.
- Microsoft Cybersecurity Analyst learning — in progress; completed the introductory computers and operating-systems course through a Women in Cloud scholarship programme.
- Express Tech Academy — Virtual Assistant Training, 2026.

ADDITIONAL TECHNICAL & TRANSFERABLE SKILLS

Documentation and reporting | Online research | Data accuracy | Microsoft Office | Google Workspace | SQL fundamentals | Customer communication | Confidential information handling
